

Shrisay Shandilya

BE, Electronics & Instrumentation

Curious and driven engineering student with a strong foundation in analytical thinking and a passion for solving complex problems. Experienced in building machine learning models and contributing to innovative, team-based AI projects—including a funded startup. Eager to learn, adapt, and apply quantitative reasoning to real-world challenges

CERTIFICATES

MLSpecialization- Andrew Ng

- 1) Supervised Machine Learning
- 2) Advanced Learning Algorithms
- 3) Unsupervised Learning, Recommenders, Reinforcement Learning

Certificate:-
<https://coursera.org/share/3410febb1b5f2c3db4e37ac36c744cec>

Deep Learning Specialization- Andrew Ng

- 1) Neural Networks
- 2) Improving Deep Neural Networks
- 3) Structuring Machine Learning Projects
- 4) Convolutional Neural Networks
- 5) Sequence Models

Certificate:-
<https://coursera.org/share/9611294fed967565ff3b4aeeeb3f9a6>

INTERESTS

Gen AI

Reinforcement Learning

Card Games

TECHNICAL SKILLS

Languages	Python, C++, SQL
Tools/Libraries	NumPy, Pandas, Matplotlib, PyTorch, TensorFlow, LangChain
Concepts	Probability, Statistics, Machine Learning, Deep Learning, Linear Algebra

PERSONAL PROJECTS

QueryBot for University Students (In Progress)

- ◇ Developing an AI-powered chatbot to assist university students with campus-related queries using RAG (Retrieval-Augmented Generation).
- ◇ Implementing document-based retrieval using simple vector search and integrated it with a basic question-answering pipeline.

Performance & Culture Management System (Terminated Startup Project)

- ◇ Part of a 5-member team building an AI-driven platform for workplace performance and culture analytics.
- ◇ Leading AI development : designing interaction-based scoring models.
- ◇ Received ₹50,000 grant to support product validation and development.

Context-Aware News Headline Classification

- ◇ Designed an NLP model combining LSTM and BERT architectures to classify news headlines by category.

Path Planning using YOLO

- ◇ Developed a lunar south pole rover path using Chandrayaan data with terrain, illumination, and hazard analysis.
- ◇ Applied regularization and optimization techniques to improve performance.

RAG-Based QA System

- ◇ Developed a basic retrieval-augmented generation model for answering questions from a custom dataset.
- ◇ Combined dense embeddings and vector search with a generative model.

Premier League Match Prediction Model

- ◇ Built a decision tree-based classifier to predict match outcomes using historical Premier League data.
- ◇ Implemented data preprocessing, feature selection, and model tuning to reach 65% prediction accuracy.

EDUCATION

B.E. (Hons) Electronics and Instrumentation Engineering Birla Institute of Technology and Science (BITS), Pilani

2024 - Present

8.32

AISSCE

DAV Public School, Kalyanpur

2022 - 2024

95%

Entrance Exams

- ◇ JEE Mains: 98.4%ile

- ◇ JEE Advanced: Qualified
